## INTRODUCTION

# Total Solutions, Delivered with Commitment.

Caneoil Management Consultant Ltd is an indigenous Nigerian company providing engineering, construction, energy, procurement, logistics and oil and gas services. We serve clients in the oil and gas, construction, transport, power and renewable energy sectors, as well as government agencies, communities and private developers.

Our work spans the full life of a project: studies and design, procurement and supply, construction and installation, haulage and lifting, commissioning and maintenance. We take on challenging projects irrespective of location, terrain or topography, and we supply the trained people and the materials those projects need.

Our approach is simple: understand exactly what the client needs, plan every detail before work begins, and deliver safely, on schedule and within budget.

Oil & Gas

Construction

Transport & Logistics

Power & Renewable Energy

Government Agencies

Communities & Private Developers

## ABOUT US

# Built on Experience.
# Driven by Professionalism.

Caneoil Management Consultant Ltd (RC 1554398) was incorporated in Nigeria on 21 January 2019 as a private company limited by shares. It was founded after years of planning by a group of professionals with combined industrial experience. Our head office is at Plot 0012, Adetokunbo Ademola Crescent, Wuse II, Abuja.

We set out to tackle the problems that hold projects back in Nigeria: substandard construction, inadequate design and a lack of professionalism. Our aim is to be the partner clients trust for total solutions, adding value to every project and earning their confidence on the next one.

We promote the Nigerian Content Initiative by using local personnel, equipment and resources on our projects. We engage Nigerians at every level and work alongside foreign support personnel where a project calls for it, so knowledge is transferred and local capacity grows. We also serve as a local content partner for overseas firms doing business in Nigeria.

Our name reflects the way we work. We treat every assignment as a managed project, from analysing its demands and carrying out conceptual studies to mobilisation, start-up, completion and commissioning.

## OUR MULTIDISCIPLINARY TEAM

Our team brings together civil, structural, electrical and mechanical engineers, geologists, surveyors, corrosion specialists, technicians, coded welders and fitters. They are supported by drivers, riggers, equipment operators, an in-house maintenance team, and finance and administrative staff.

# Vision, Mission and Core Values

Our vision, mission and core values define who we are, guide our decisions and shape the way we work. They reflect our commitment to excellence, integrity and sustainable growth, and they inspire us to deliver lasting value to our clients, partners and communities.

## Our Vision

To be a leading African energy and infrastructure solutions company, recognised for excellence, innovation and sustainable impact.

## Our Mission

To deliver integrated engineering, construction, energy and infrastructure solutions through professionalism, innovation and a commitment to quality, safety and sustainability.

## Our Core Values

Our core values are the foundation of our culture and the principles that guide our relationships, decisions and delivery. We are committed to:

### Integrity

We do the right thing, always.

### Excellence

We strive for the highest standards in everything we do.

### Teamwork

We work together to achieve greater results.

### Innovation

We embrace new ideas and better ways of working.

### Sustainability

We are committed to long-term value for people, communities and the environment.

### Partnership

We build lasting relationships based on trust and mutual growth.

# OUR SERVICES

Caneoil delivers twelve groups of services that cover every stage of a project, from design and supply to haulage, energy and maintenance.

01

### Engineering Design and Consultancy

Feasibility studies, detailed design and technical advice for sustainable solutions.

02

### Oil and Gas Marketing and Trading

Marketing and trading of petroleum products and related commodities.

03

### Water Supply and Borehole Drilling

Water supply systems, borehole drilling and water infrastructure development.

04

### Electrical, Power and Solar Energy

Electrical installations, power systems and renewable (solar) energy solutions.

05

### Mechanical, Pipeline and Oil Field Services

Mechanical works, pipeline installation and oil field support services.

06

### Survey and Environmental Services

Land, marine and topographic surveys, and environmental studies and management.

07

### Procurement, Supply and Equipment Leasing

Sourcing, supply and leasing of equipment, materials and spares.

08

### Logistics and Haulage

Transportation, haulage and logistics support for projects across Nigeria and beyond.

09

### Catering Services

Site, camp and canteen catering, events and packed meal delivery.

10

### Consultancy, Project Management and Training

Project advisory, management support and capacity building through training.

11

### Manpower Supply

Provision of skilled and unskilled personnel for projects and operations.

12

### ICT, Telecoms and Security Systems

ICT solutions, telecoms infrastructure and integrated security systems.

OUR SERVICES

# Engineering Design and Consultancy

Our engineers take projects from concept to construction-ready designs. Our technical staff carry out field services and laboratory analysis and prepare final reports.

01

### Civil and structural engineering

Analysis, design and detailing, from simple residential buildings to commercial structures and industrial space frames in concrete, steel and timber.

02

### Highways and transportation

Transport planning, route location, pavement design, culverts and bridge design.

03

### Water and wastewater engineering

Water supply schemes, water-retaining structures, irrigation projects, dams, and water and sewage treatment plants.

04

### Erosion control and drainage

Design of erosion control works, earth-retaining structures and drainage networks.

05

### Geotechnical investigation

Sub-soil investigation and foundation design for buildings, telecommunication masts, dams, roads and bridges, plus core drilling for dam sites and mining exploration.

06

### Hydraulics

Pipe network design and analysis, and physical modelling of hydraulic structures.

07

### Design review

Designs supplied by clients go through the same rigorous testing as our own.

OUR SERVICES

# Oil and Gas Marketing and Trading.

Caneoil has been granted a Nigerian Upstream Petroleum Regulatory Commission (NUPRC) permit as an oil industry service company, in the specialised category for petroleum products (white products) marketing and trading.

01

### Petroleum Products

Marketing, trading and supply of refined white products, including petrol (PMS), diesel (AGO) and kerosene (DPK).

02

### Bulk Supply

Deliveries to industrial, commercial and institutional customers, backed by our own logistics capacity.

## Reliable Supply. for a Stronger Nigeria.

We deliver quality petroleum products with reliable logistics to power industries, businesses and communities across the country.

OUR SERVICES

# Water Supply and Borehole Driling

We find, drill and develop groundwater, and design water systems from a single borehole to a regional scheme.

**01**

### Groundwater Survey

Site visits to confirm feasibility, location and estimated depth, with hydrological reports where required.

**02**

### Borehole Drilling

Motorised and solar-powered boreholes for drinking water, agriculture and industry, delivered turnkey and sized to demand, up to 100,000 litres a day.

**03**

### Inspection and Servicing

Installation, servicing and camera inspection of boreholes.

**04**

### Water Supply Systems

Communal, industrial and regional water supply, intake works, pumping stations and water towers.

**05**

### Water Resources

Exploration of ground and surface water, and complete water management planning and development.

**06**

### Sanitation

Plumbing, sewage systems, wastewater engineering and solid waste management.

**07**

### Drilling Equipment

Supply of water well drilling rigs and drilling tools through manufacturer partnerships.

## Water Solutions. Stronger Communities.

From single boreholes to regional schemes, we deliver reliable water supply solutions that support homes, businesses, industries and communities.

OUR SERVICES

# Electrical, Power and Solar Energy

Our trained and experienced electrical engineers plan, install and maintain power systems, from building wiring to rural electrification and solar plants.

**01**

### Electrification

Rural and urban electrification, and installation of street lights.

**02**

### Power Systems

Power generation and transmission, substation planning and control, and electrical reticulation in buildings.

**03**

### Cabling

Underground and overhead cabling, and laying, maintenance and repair of high- and low-tension cables.

**04**

### Equipment Supply

Generators, transformers, electric cables, rectifiers and automatic voltage regulators.

**05**

### Installation and Commissioning

Electrical installation and maintenance for homes and industrial buildings, commissioning of electrical equipment, and fabrication of generating sets from 3 kVA to 40 kVA.

**06**

### Instrumentation

Electrical instrumentation, electronic control systems, and troubleshooting of analog and digital instruments.

**07**

### Cooling

Air-conditioning, refrigeration and cold rooms for homes, estates and industry.

**08**

### Solar Energy

We plan, design, supply and install solar power systems for homes, businesses, local councils and states, including off-grid systems for communities with little or no electricity, and we maintain them.

**09**

### Energy Consultancy

Advice on power needs, energy saving and renewable energy options.

## Reliable Power. Brighter Communities.

From building wiring to large-scale solar plants, we deliver safe, efficient and sustainable power solutions for homes, businesses, industries and communities.

OUR SERVICES

# Mechanical, Pipeline and Oil Field Services.

Our mechanical team of engineers, geologists, technicians, coded welders, fitters and support crew serves oil and gas, chemical and manufacturing clients.

01

### Pipelines

Pipeline construction, flow line pressure testing and repair of pipes.

02

### Welding and Fabrication

Welding of all kinds by coded welders, fabrication and installation of vessels and tanks, and pressure vessel repairs.

03

### Plant Maintenance

Maintenance of cranes, hoists, generating plant, tractors, boilers, pumps and compressors.

04

### Oil Field Support

Maintenance of oil drilling platforms, and repair and servicing of navigational aids (NAVAIDS).

05

### Corrosion Engineering

Above-water and underwater inspection; monitoring, interpretation and evaluation of corrosion problems; supply of anti-corrosion paints; and repainting of pipes with anti-corrosion coatings.

06

### Instrumentation and Control

Supply, installation and repair of valves, controllers, transmitters and gauges; flow line data monitoring; design, fabrication and installation of instrument panels and loops; and revamps of oil field stations, platforms and unit operation systems.

## Engineering for Energy and Industry.

We deliver reliable mechanical, pipeline and oil field solutions that support safe operations, higher productivity and long-term value for our clients.

OUR SERVICES

# Survey and Environmental Services.

We provide the survey data and environmental studies that projects need before, during and after construction.

01

### Route Surveys

Route and as-built surveys for pipelines, power lines, railways and oil locations.

02

### Structural Monitoring

Tank subsidence monitoring and deformation analysis.

03

### Marine Surveys

Bathymetry, subsea scanning, profiling and coring, and pre- and post-dredging surveys.

04

### Pipeline Integrity

Pipeline coating integrity surveys, soil resistivity surveys and pipeline pigging.

05

### Positioning and Mapping

GPS positioning, total station observation and monitoring, and geographic information systems (GIS).

06

### Environment

Environmental impact assessments, environmental baseline data and environmental protection projects, with community mobilisation where a project needs local support.

## Data for Better Decisions.

Accurate survey data and environmental insights that reduce risk, protect communities and support the successful delivery of your projects.

OUR SERVICES

# Procurement, Supply and Equipment Leasing.

We source and supply manufactured materials, goods and equipment to any location for the oil and gas, construction, transport, energy, energy saving and renewable energy industries.

01

### End-to-end Procurement

Sourcing, ordering, expediting, inspection, consolidation, marking, tagging, packaging and shipping to the client's destination, locally and internationally.

02

### Schedule Control

Our procurement team works closely with client project teams and vendors, so every purchase and delivery keeps to the project schedule.

03

### Quality Assurance

Supplies are planned to meet international standards, and conformity with contract and regulatory requirements is checked against evidence.

04

### Equipment Leasing

Construction, lifting and haulage equipment available on lease.

05

### General Supplies

General merchandise, office equipment and consumables for public and private clients.

## Reliable Supply. Projects Without Delay.

We deliver the right materials, equipment and support services to keep your projects on track, anywhere in Nigeria and beyond.

OUR SERVICES

# Logistics and Haulage.

Our haulage network covers the length and breadth of Nigeria. Whether the destination is a busy port, a city construction site or a rig location in a remote community, we have the trucks, the crew and the experience to get the cargo there. We handle single trips and long-term, high-volume contracts with equal care.

01

## Lowbed Trucking

Built for the heaviest and tallest loads, including excavators, bulldozers and graders, industrial machinery, oversized and overweight cargo, and large oilfield and rig equipment.

02

## Flatbed Trucking

20ft and 40ft containers, building materials, steel structures, pipes, oilfield tools and equipment, and break-bulk cargo, for port evacuation and site-to-site deliveries.

03

## Crane and Forklift Services

Cranes and forklifts with trained operators for loading, offloading, lifting and positioning cargo at ports, warehouses and project sites. Every lift is planned to protect the cargo and the people around it.

04

## Truck Maintenance

Our mechanics, welders, panel beaters and auto electricians keep our fleet in top condition and offer the same service to other fleet owners, covering routine servicing, repairs and refurbishment on trucks of all makes and models.

**Moving Nigeria Further Together.**

Reliable haulage and logistics solutions that keep your projects on schedule, wherever the destination.

OUR SERVICES

# Catering Services.

Caneoil provides catering for oil and gas sites, project camps and workplaces across Nigeria. Our cooks prepare fresh Nigerian and continental meals in clean, well-run kitchens, served on site, in staff canteens or delivered as packed meals, all to strict food hygiene and safety standards.

01

### Site and Camp Catering

Freshly cooked meals for onshore and offshore crews, project camps, staff canteens and corporate events.

02

### Delivery and Camp Services

Packed meals and bulk food delivered to remote sites, food provisions supply, and camp housekeeping and laundry.

## Good Food. Stronger Teams.

We serve fresh, safe and nourishing meals that keep crews healthy, focused and productive, wherever the work takes them.

OUR SERVICES

# Consultancy, Project Management and Training.

We bring management and engineering expertise to clients who need a plan, a team or a second opinion.

01

### Project Management

Planning, scheduling, supervision and close-out of construction and engineering projects.

02

### Management Consultancy

Industrial engineering and management services, and commercial support services.

03

### Building and Engineering Consultancy

Advice and supervision on building, civil and infrastructure projects.

04

### Industrial Safety Consultancy

Safety assessments and advice for industrial sites and operations.

05

### Training

Technical manpower training for exploration and production activities, and training in corrosion control and maintenance.

## Expert People. Stronger Projects.

Management, engineering and training support that helps our clients plan better, work safer and achieve more.

OUR SERVICES

# Manpower Supply.

We supply qualified Nigerian technical and support personnel for short- and long-term assignments, in line with the Nigerian Content Initiative.

**01**

### Technical Staff

Engineers, geologists, surveyors, technicians, coded welders, fitters and electricians.

**02**

### Operations Staff

Drivers, riggers, equipment operators and site crew.

**03**

### Support Staff

Finance, administrative and logistics personnel.

## People Who Keep Projects Moving.

Skilled and reliable manpower to support your operations, today and tomorrow.

OUR SERVICES

# ICT, Telecoms and Security Systems.

We supply, install and maintain the technology that keeps offices and sites connected and secure.

01

### Computers and IT

Supply of computers, hardware and electronic equipment, maintenance and repairs, and general computer services.

02

### Networking and Telecoms

Network and telecommunication installations.

03

### Access Control and CCTV

Electronic access control systems, from standalone single-door controllers to networked systems integrated with closed-circuit television (CCTV).

## Secure. Connected. Always Operational.

Reliable ICT, telecoms and security solutions that keep your people, assets and operations safe and connected.

HOW WE WORK

# How we work.

Every assignment, from a single delivery to a turnkey project, follows the same five steps.

**01**

### Enquiry and assessment

We study the client's requirements, the site and the scope of work, including cargo details, weights and dimensions for logistics jobs.

**02**

### Studies and planning

We carry out surveys and investigations, prepare designs and method statements, select equipment and routes, and obtain any required permits.

**03**

### Mobilisation

The right team, equipment and materials are deployed to site or to the pickup location.

**04**

### Execution and monitoring

Work follows the approved designs, with data collected continuously, independent quality checks and regular updates to the client. Every movement on the road is tracked.

**05**

### Completion and handover

We test, commission and hand over the work, or deliver and offload the cargo, and the client confirms sign-off. Maintenance support continues after handover.

**A Structured Process. A Trusted Result.**

WHY CHOOSE CANEOIL

# Why choose Caneoil.

01

## One partner, total solutions

Design, supply, construction, energy, haulage and maintenance from a single company, with one point of accountability.

02

## Qualified professionals

COREN-registered engineers, experienced technicians, coded welders and trained operators.

03

## Quality you can verify

An independent quality control unit and transparent testing that clients can witness.

04

## Safety first

A Zero Lost Time Injury philosophy on every site and every trip.

05

## Local content

Nigerian personnel, equipment and resources, with knowledge transfer built into our projects.

06

## Nationwide reach

We work in any location, terrain or topography, including remote and difficult sites.

07

## Transparent pricing

Competitive quotes with no hidden charges.

08

## Repeat business

Our reliability and timely completion bring clients back with repeat commissions.

**Trusted People.**
**Lasting Partnerships.**
We deliver value, build relationships and keep projects moving.

QUALITY, HEALTH, SAFETY AND ENVIRONMENT

# Quality, Health, Safety and Environment.

Caneoil treats quality, health, safety and the environment as a continuing commitment on every project. We adopt a Zero Lost Time Injury (ZLTI) philosophy and believe that the safest way is the best way, so safety carries a high premium in everything we do.

01

## Health and Safety

Our people are trained in safe working, lifting, loading and securing practices, and our vehicles and equipment are inspected before deployment. We continuously work to reduce risks and hazards to our employees' health and safety.

02

## Quality

An independent quality control unit tests all ongoing work against the set standards, and our testing procedures are open to clients. Supplies are planned to international standards, and conformity is assessed on evidence.

03

## Environment

We comply with applicable regulations, carry out environmental impact assessments where projects require them, and minimise our impact on the communities and environments where we work.

**Safe People.**
**Reliable Operations.**
**A Cleaner Tomorrow.**

Quality, health, safety and environment are at the heart of everything we do.

KEY PERSONNEL

# Key Personnel.

Caneoil is led by a board of experienced professionals in project execution, supported by qualified technical and finance staff.

## Board of Directors

Caneoil is led by a board of experienced professionals in project execution.

- **Muhammadu Bello Dabai**
- **Abdullahi Garba Muhammad**

### Engr. Abdullahi Muhammad Nabade

- **Civil and structural engineering:** structural design, construction supervision, soil bearing capacity studies and water tank design.
- B.Eng Civil Engineering, Bayero University Kano
- M.Sc Civil Engineering, Ahmadu Bello University, Zaria
- COREN-registered engineer
- Member, Nigerian Society of Engineers.

### Ummar Sanusi Sarki

- Finance and accounts.
- B.Sc Accounting and MBA, University of Abuja
- Postgraduate Diploma in Accountancy
- Member, Association of National Accountants of Nigeria (ANAN).

**Experienced People. Successful Projects.**

A team that delivers value, builds to standard and keeps projects moving.

COMPANY INFORMATION AND REGISTRATIONS

# Company information and registrations.

Caneoil is registered with the Corporate Affairs Commission and with Nigeria's key regulatory and statutory bodies.

**Company name**
Caneoil Management Consultant Ltd

**RC number**
1554398

**Incorporated**
21 January 2019, Corporate Affairs Commission, private company limited by shares
